

IEMA / IAIA Ireland-UK Branch

Regional Strategic Environmental Assessment Forum: Integration in SEA

23rd October 2008

Venue:

**Carriageworks, Millennium Square, Leeds. LS2 3AD
9.30am – 4.30pm**

The Regional Strategic Environmental Assessment Forum will build on Yorkshire's reputation for holding dynamic and effective SEA events (Leeds hosted IEMA's national SEA Forum in 2006 and 2007).

The event will bring together all those involved in strategic planning process who have an interest in how consideration of the environment is integrated into the plan-making process. The theme of the event is Integration within SEA / Sustainability Appraisal (SA) and it will allow delegates to learn about integration from a number of different perspectives.

The event includes presentations on key issues within SEA / SA (including the assessment of cumulative effects and how SEA/SA outputs can be used in project planning). Delegates will also have the opportunity to select breakout sessions to attend on key environmental topics (climate change mitigation and adaptation, strategic flood risk assessment, health impact assessment, etc) as well as having opportunities to discuss issues with likeminded individuals.

Although the Regional SEA Forum will focus on examples and case studies from within the Yorkshire and Humber region it will provide a valuable learning and networking opportunity for all those involved in SEA / SA across the UK.

Reserve your place NOW by completing the Booking Form on the reverse side of this page and returning it to the IEMA by post, fax or e-mail.

For more information on the Regional Strategic Environmental Assessment Forum including speakers and breakout sessions please visit <http://www.iema.net/>
